-Thank you from Gene & Lil Foth – “We are so thankful for you, our praying church family. After additional blood work and a PET/CT scan last Tuesday we received good news! My large cancerous tumor is gone! The left front cancerous lymph node is gone! My right front lymph node is shrunk to half the size it was when we started treatment. We will repeat clinical surveillance with another PET/CT scan in 3 months. Thank you everyone for your prayers, support and phone calls of encouragement.”
